DOĞAL TAŞLAR

ALİ DEĞİRMENCİ

Doğanın güçlerini kullanarak şekillendirdiği; yine kendinden bir şeyler katarak binlerce renge dönüştürdüğü, insanlık tarihinden çok daha önce var olan, bir devre ismini veren ve ekolojik olmaları sebebiyle de hiçbir zaman kullanılmaktan vazgeçilmeyecek olan doğal taşlar..

"Zaman" ve "Doğa" nın birleşimi..

Varolduğu dönemin her türlü etkisini içinde barındırarak, sanatın ve mimarinin hemen hemen her akımını görselimize taşıyan, doğanın doğrudan temsili olan doğal taşlar; kimi zaman adeta bir post empresyonizm örneği, kimi zaman sürreal bir Miró eseri, kimi zaman ise ekspresyonist bir tablo.

Pozitif ve rasyonelist yaklaşanlar için tabiatın mucizesi, inancı kuvvetli olanlar için ise Tanrı'nın.

Bazen denge, dinginlik ve düzen duygusu; kimi için görsel karışıklık, kimi içinse klasik kusursuzluk..

Kiminin savaşların tam ortasında kalması, kiminin kükreyen volkanların susmasıyla ortaya çıkması..

Lapislerin, sodalitlerin, arduazların, bazaltların ve onikslerin hem benzer hem de çıktıkları yörelerdeki farklı hikayeleri.

Onların bulundukları ülkelerde keşfe çıkmak ve onların renkli dünyasında kaybolmak..

Kireç taşlarının yüksek sıcaklık ve basıncın etkisiyle mermere dönüşmesi; kuvarsın ve feldspatın, mika veya diğer madenlerin etkisiyle derinlerdeki sert kayaçların granitleşmesi ve daha binlerce oluşum..

Taşların enerjilerine inananlar içinse, auranın her rengini barındıran dipsiz bir kuyu.

Sonra birden Pablo Picasso'nun eserlerinden birine rastlayıp ona sahip olma duygusu, ya da mavilerle turkuazların birleştiği bir Van Gogh.. Ve finalde, aynı duyguları yaşayan müşterilerimizin gözlerindeki parlaklık ve nereye bakacağını bilememe duygusu..

İşte tüm yorgunlukları unutturan o an!

NATURAL STONES

Natural Stones; that shaped by the strength of nature and by transforming itself into thousands of colors. Pre-existent before human history, namesake of an age and will never to be abandoned due to their ecological structures.

Combination of "Time" and "Nature" ..

Natural Stones contain and reflect the eons of their existence and bring almost every movement of art and architecture to our vision, are a direct representation of nature; whether in a post-impressionist or expressionist style, or like a surreal Miró.

It is the miracle of nature for those who are positive and rationalist, and God for those who have strong faith.

Sometimes a sense of balance, calmness and order; visual confusion for some, classic perfection for others..

Some remain in the midst of wars and some others emerge from the silence of roaring volcanoes.

Lapis, sodalite, slate, basalt and onyx have both similar and different stories in the regions where they emerge.

Exploring their countries and getting lost in their colorful world..

The conversion of limestone into marble with the effect of high temperature and pressure; the formation of quartz and feldspar, granitization of the hard rocks which situated in the deep, with mica or under the influence of other mines and thousands more formations..

A bottomless well that includes every color of the aura, for those who believe in the energies of the stones.

Then, all of a sudden coming across a Pablo Picasso and the feeling of possession, or a Van Gogh where the shades of blue and turquoise mix and combine.

And at that moment, the gleam in the eyes of our customers when they have this feeling and don't know what to do.

That's the moment when it's all worth it!

LABRADORITE with ammonites

Labradorite is a member of the Feldspar family and is treasured for its remarkable play of color, known as labradorescence. The stone, usually gray-green, dark gray, black or grayish-white, is composed in aggregate layers that refract light as iridescent flashes of peacock blue, gold, pale green, or coppery red. The predominant blue varies within the light, displaying hues from deepest blue to various shades of pale, almost blue-green.

1 agate rubane
2 agate rubane *backlit*
3 fluorite
4 fluorite *backlit*

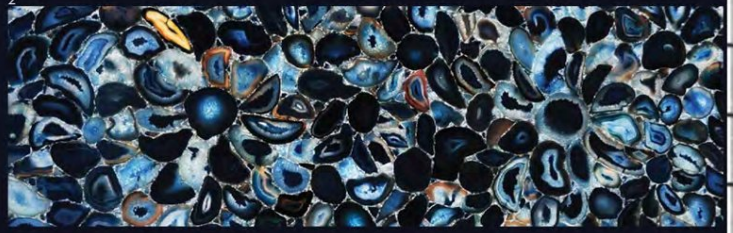

A special place, for special moments, can't have anything but a special design, which combines modern features and technology. By this design, but also due to its beneficial properties, Agate Rubane ennobles the environment with tranquillity and releases the spirit of creation.

leather finish

Maer Charme is proud to introduce itself as the world's **first and only manufacturer** in the industry of semiprecious stones that offers **leather finish**. The stone finishing is an important factor for the final appearance of the stone, for its final destination and placement according to project and at the same time it influences the functional purposes such as durability and slip resistance. Leather finish renders a soft texture to the surface and gives the illusion of an aged, antique appearance, it closes the pores and increases the performance of the work surface while introducing slight textures. Each piece presents an unique character and it is our goal, through dedicated and rigorous service, to cherish the beauties of nature and to provide the utmost level of customer satisfaction. while going back in time and share them with our clients.

LIGHT & CLEAR
COLLECTION

LIGHT&CLEAR Collection is the result of more than 2 years of continuous research for our mixed team of Romanian and Italian engineers and designers and represents our passion for beautiful and high technology.

O% deformation after 140 celsius degrees / 284 Fahrenheit J 24hrs continuous exposure. Special quality materials are used in order to assure maximum UV resistance. with special color development in MAER laboratories /Blue Agathe color is JOOZ result of MAER laboratories researchJ. We deliver various product dimensions. with a maximum of 150x300cm I 59. O5 xl 18.JJO inch or 'cut to size' Minimum thickness is 6mm. the weight for this thickness being 16.5Kglsqm while at the standard 2cm thickness the weight is 55Kglsqm.
All our products are calibrated.
LIGHT&CLEAR Collection materials offer a superb transparency. so that smart illumination wi/1 create an exquisite atmosphere both for private and public spaces.

LIGHT & CLEAR Collection complies with the highest standards in terms of:
-weight for special applications
-open fire resistance coefficient fno smoke and burning

ON AIR
